

Attention Firefox Users

Savings Bank of Mendocino County would like to inform all our users that Firefox released Version 57 on November 14, 2017. This update is automatically being pushed to all Firefox users. With this update, Java will no longer work and will prevent users from using Java within Firefox. Previously users could prevent this by choosing to not upgrade the version of Firefox that they were using. The recent release will no longer leave this as an option.

We recommend that you choose one of the following options.

1. Continue using the Java option by switching to Internet Explorer on a PC or Safari on a Mac as these are the only browsers that will continue to support Java at this time.
2. Install WebScan by navigating to the documentation link within the remote deposit application and using the Installation Assistant. The installation assistant has been developed to make the WebScan installation a seamless experience for our users. Once WebScan has been installed, change your profile to reflect the WebScan option for your scanner.

Please take immediate action to prevent interruptions in using SBMC Online Banking and BillPay.
